

I attended an Outstanding Management Skills Workshop, with John Males. Excellent highly recommend!!!

The course content was great and covered many areas as a new manager that I felt were very good. John Males engaged us in what he was teaching, and used many activities and role-play models where he could see our strengths and weakness.

He also had us share our own experiences with employees and gave us great feedback.

When I returned to work this morning, I started evaluating how my leadership style was in regards to my direct employees, and thinking on how to use the new skills learned at the workshop.
